INTELLIGENCE & IMPACT

Fleet intelligence platform, reporting, and sustainability

04

WHY PARTNER WITH US

The proven choice for fleet management in Mauritius

An aerial photograph of a winding asphalt road that curves along a rugged, rocky coastline. The road is bordered by a low stone wall on the ocean side. Several cars are visible on the road, including a white van, a red car, and a yellow car. The water is a vibrant turquoise color, and the sky is a deep blue. The overall scene is serene and scenic.

01

WHO WE ARE

Your trusted fleet management partner in the Indian Ocean since 2008

FROTCOM[®]

Company Overview

2008

Operating in Mauritius since 2008

Customers across 5 continents with local support

Continuous R&D
Investment in AI, telematics, and business intelligence

ISO 9001 Certified
Internationally recognised quality standards

Industry Recognition
Multiple awards for innovation and excellence

Vision, Mission & Approach

OUR VISION

To be the **preferred partner for intelligent fleet management solutions**, empowering organisations to make smarter operational decisions through technology, innovation, and actionable business intelligence.

OUR MISSION

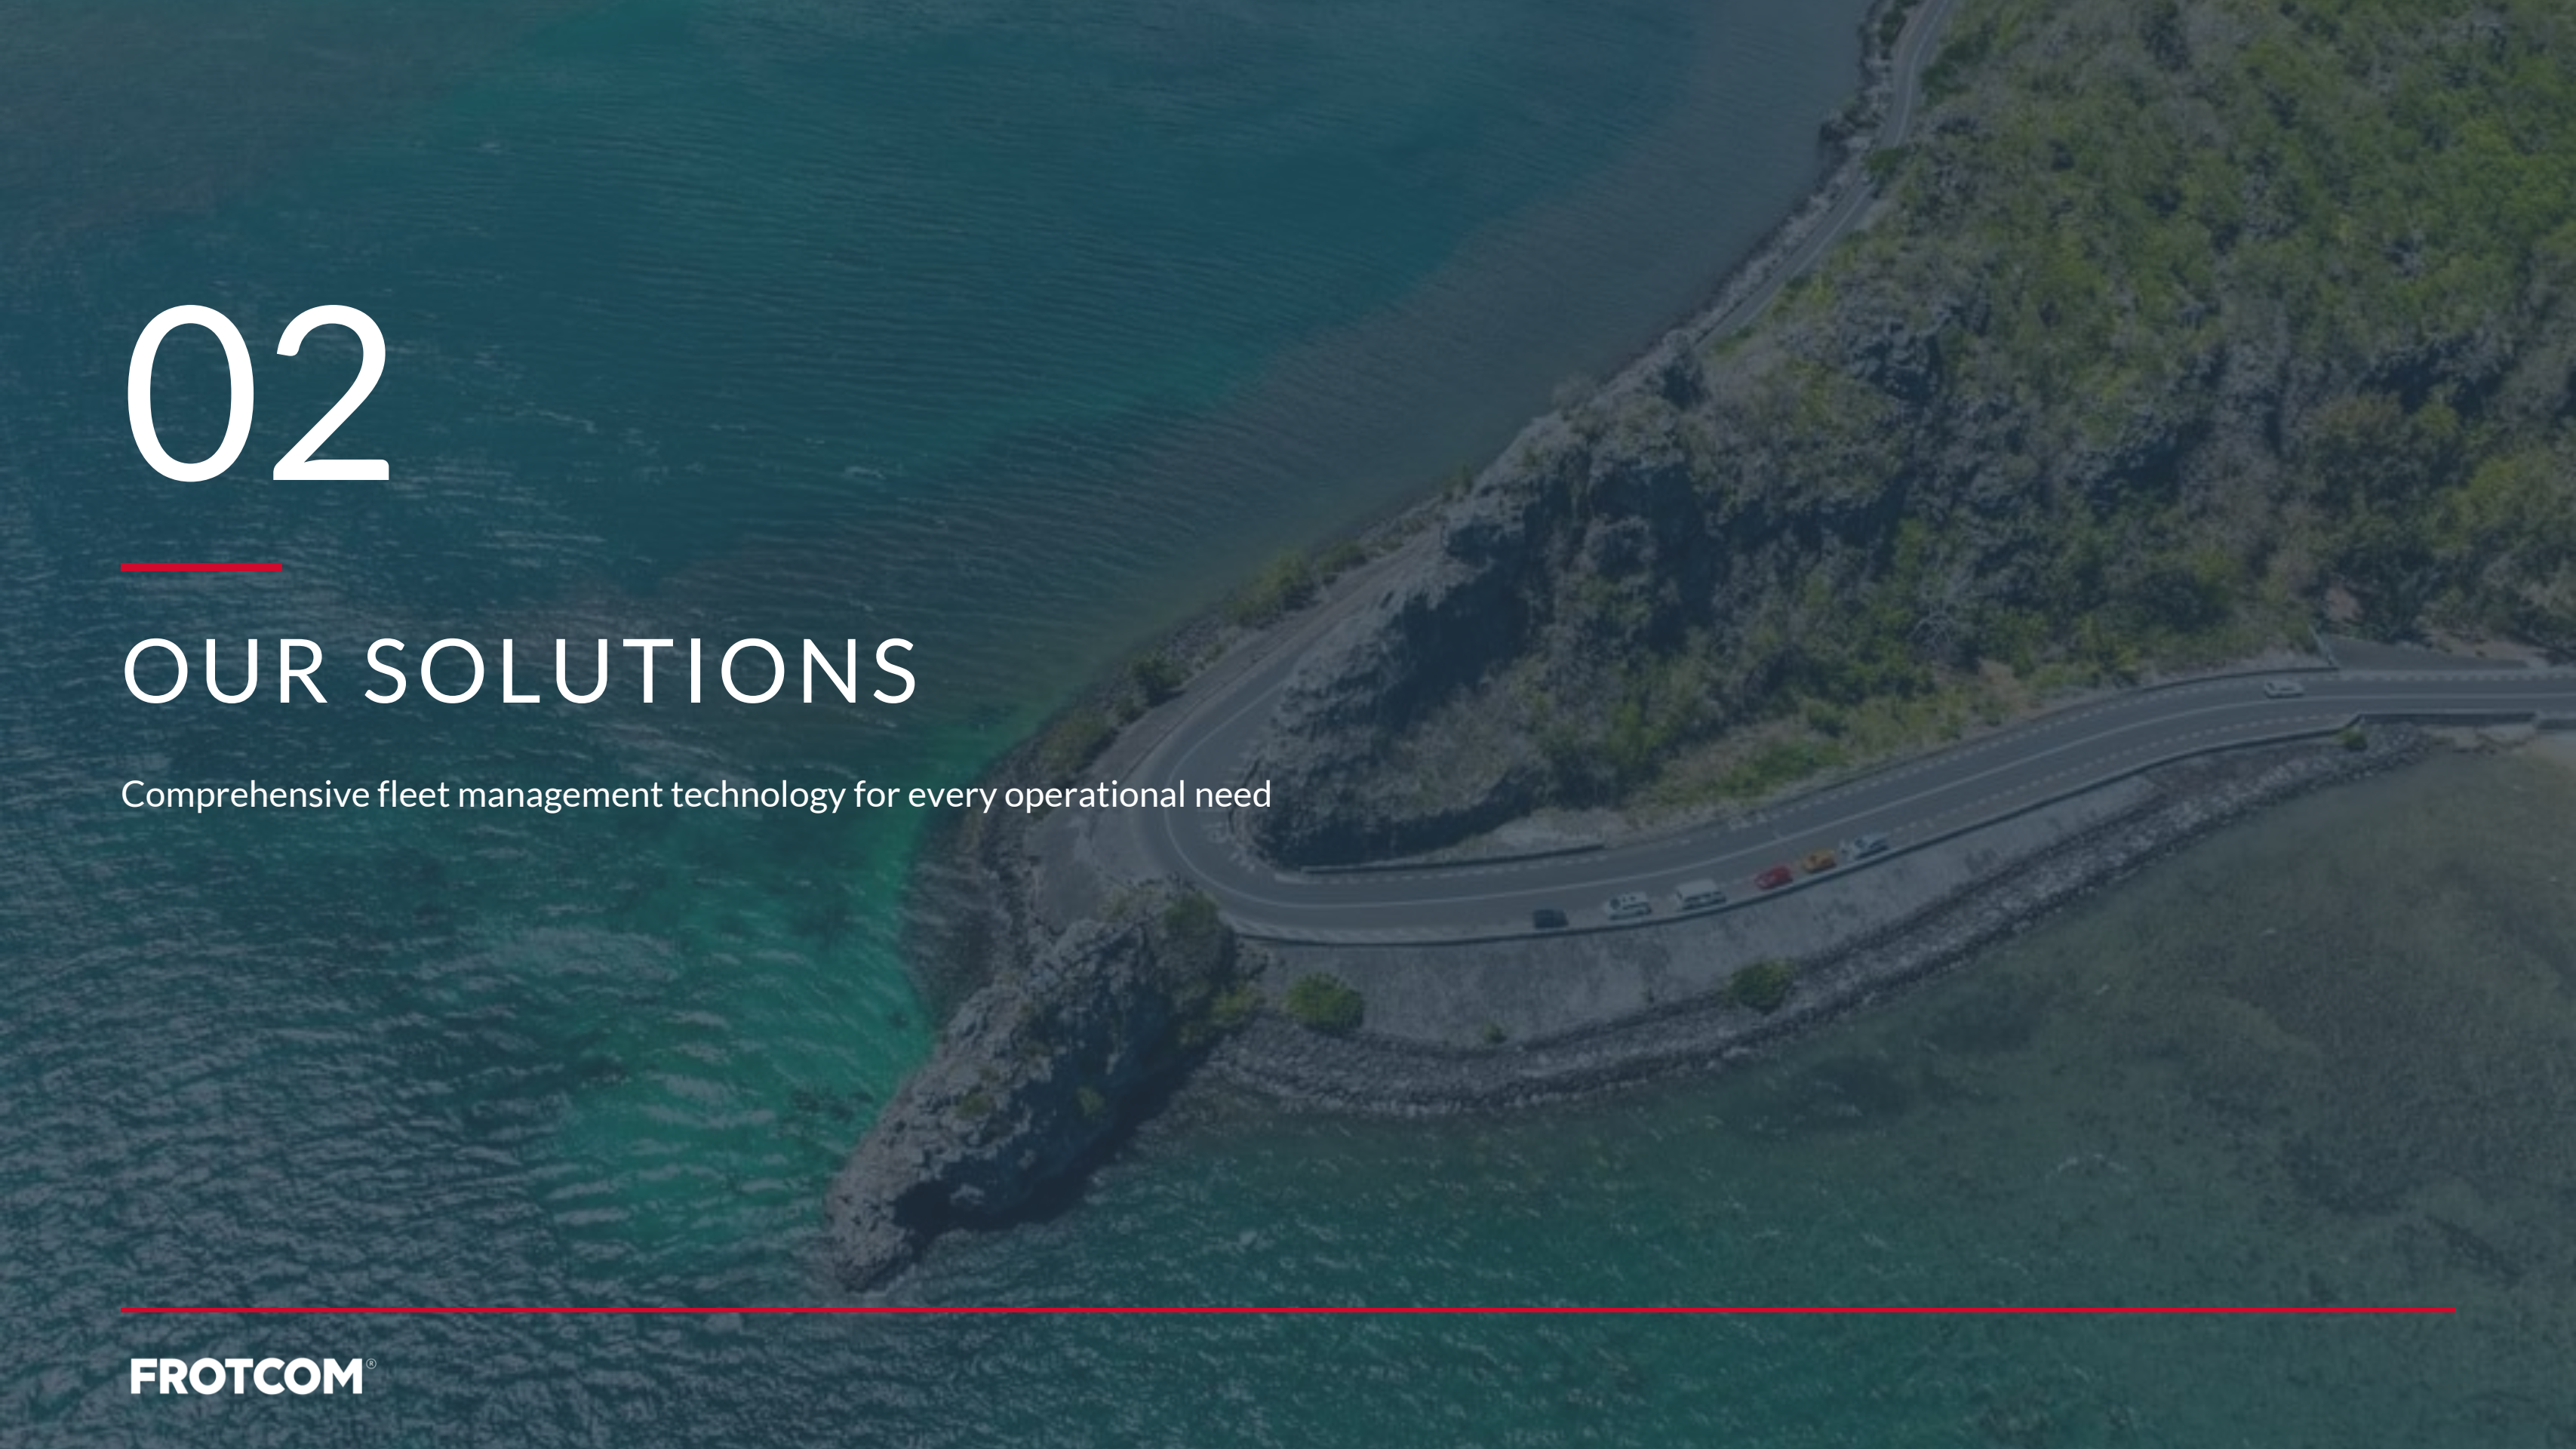

To help organisations **improve fleet performance, enhance safety, reduce operational costs**, increase productivity, and achieve sustainable growth through innovative fleet management technologies.

Our Approach

We believe fleet management extends far beyond vehicle tracking. Modern organisations require meaningful information that enables better decisions, improved operational control, and measurable business outcomes.

"Our solutions transform raw vehicle data into actionable intelligence that helps management teams understand not only where their vehicles are, but how efficiently they are operating."

02

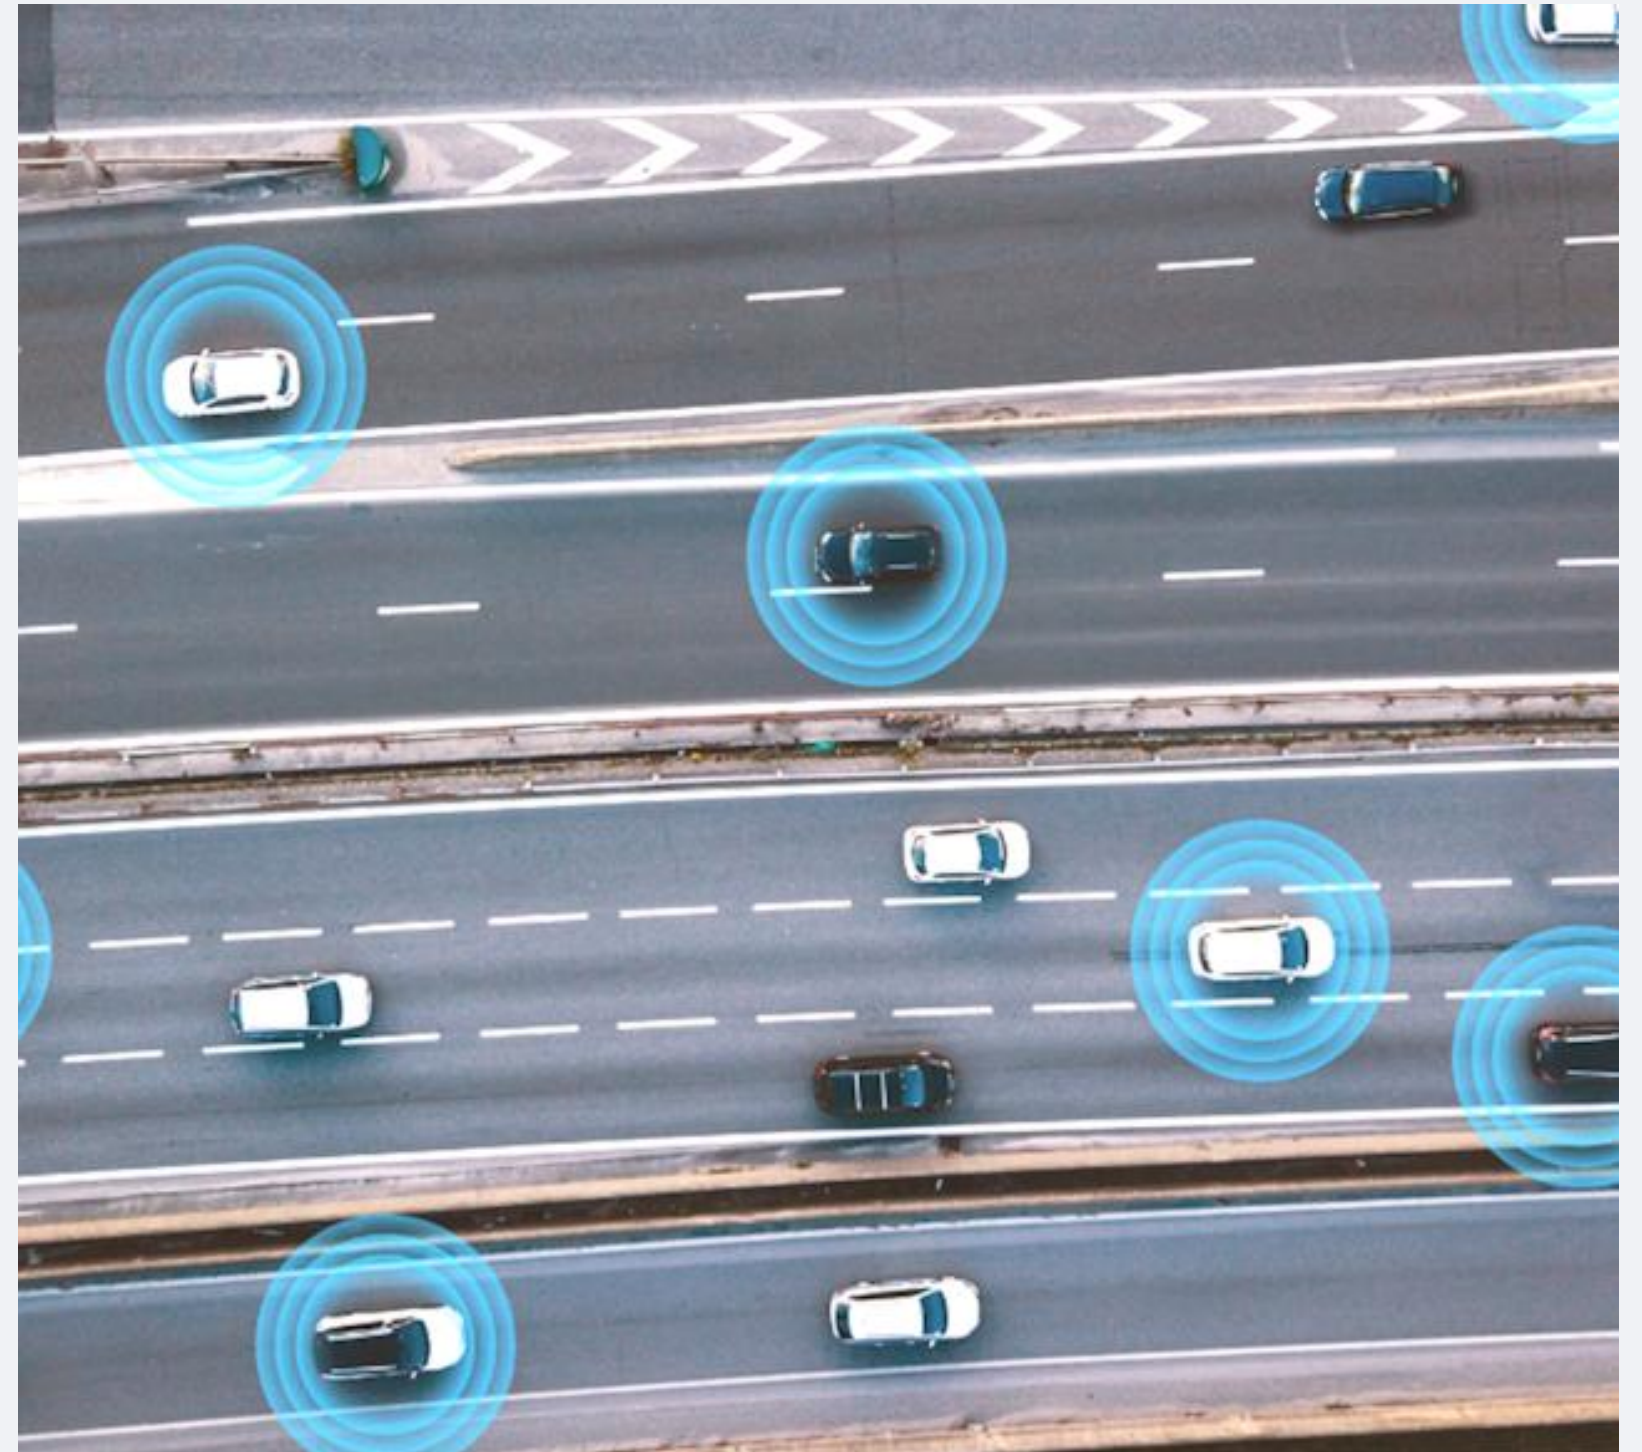

OUR SOLUTIONS

Comprehensive fleet management technology for every operational need

Real-Time GPS Tracking & Monitoring

Gain **complete visibility** over fleet operations through real-time vehicle tracking and monitoring from any device, anywhere.

-  **Live Vehicle Monitoring**
Track locations, movements, ignition status in real time
-  **Route History**
Review detailed trip histories and improve route planning
-  **Geofencing**
Virtual boundaries with automatic entry/exit alerts
-  **Arrival & Departure Alerts**
Automated notifications for operational monitoring
-  **Driver Identification**
Associate every journey with a specific driver
-  **Mobile & Web Access**
Access fleet data from desktop, tablet, or smartphone

Fuel Management & Cost Optimisation

Fuel often represents the **largest operational expense** within a fleet. Frotcom provides advanced tools to control consumption and reduce unnecessary expenditure.

Consumption Monitoring

Measure and analyse fuel usage across vehicles and drivers

Fuel Theft Detection

Identify suspicious fuel losses through automated monitoring

Refuelling Verification

Verify every refill by monitoring location, volume, and timing

Excessive Idling Detection

Reduce fuel wastage, emissions, and engine wear

Efficiency Analysis

Compare vehicle and driver fuel performance

Generate detailed **cost reports** that provide management with complete visibility of fuel-related expenses across the entire fleet operation.

Driver Behaviour & Safety Management

Driver behaviour directly influences **safety, operating costs, vehicle lifespan, and corporate reputation**. Frotcom helps you monitor and improve driver performance.

Speeding Monitoring

Identify speeding incidents in real time and support compliance

Harsh Acceleration

Monitor aggressive patterns that increase fuel consumption

Harsh Braking Analysis

Detect unsafe braking events and risky driving practices

Aggressive Cornering

Monitor unsafe manoeuvres compromising stability

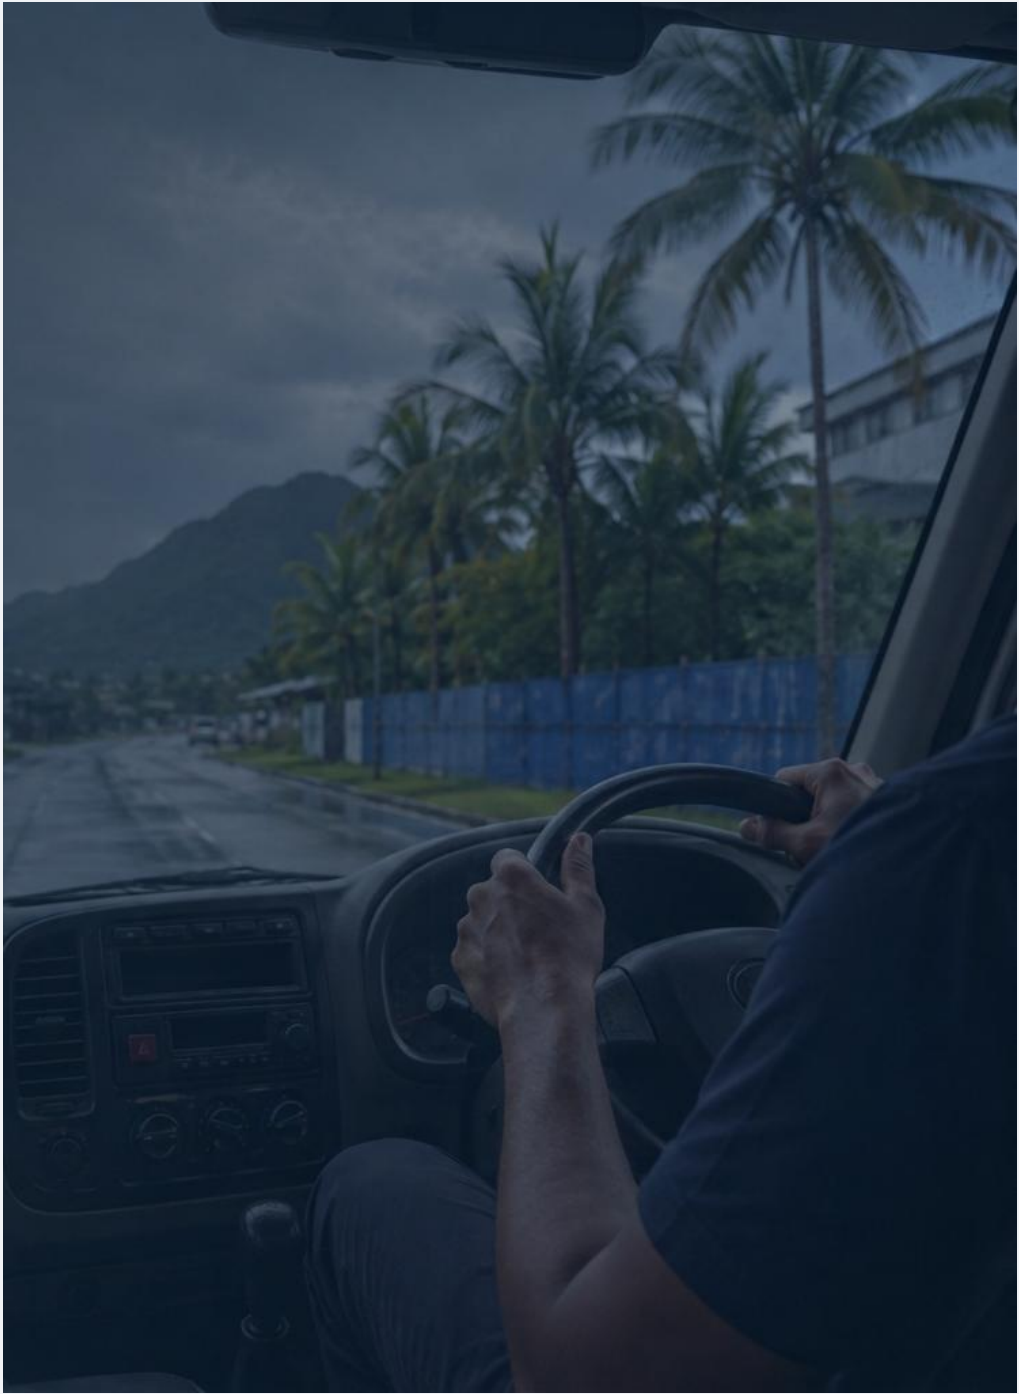

Performance Scoring

Automatic evaluation using objective safety indicators

Driver Coaching

Targeted training for safer, more economical driving

Vehicle Security & Maintenance

Vehicle Security

- Real-time security alerts for unauthorised usage
- Geofence breach detection and alerts
- Ignition monitoring outside authorised hours
- Tow-away and battery disconnect alerts
- Theft recovery support via real-time location

Maintenance Management

- Preventive maintenance scheduling by mileage/hours
- Automated maintenance reminders and alerts
- Repair cost monitoring and tracking
- Complete vehicle health and service histories
- Long-term fleet planning and asset replacement

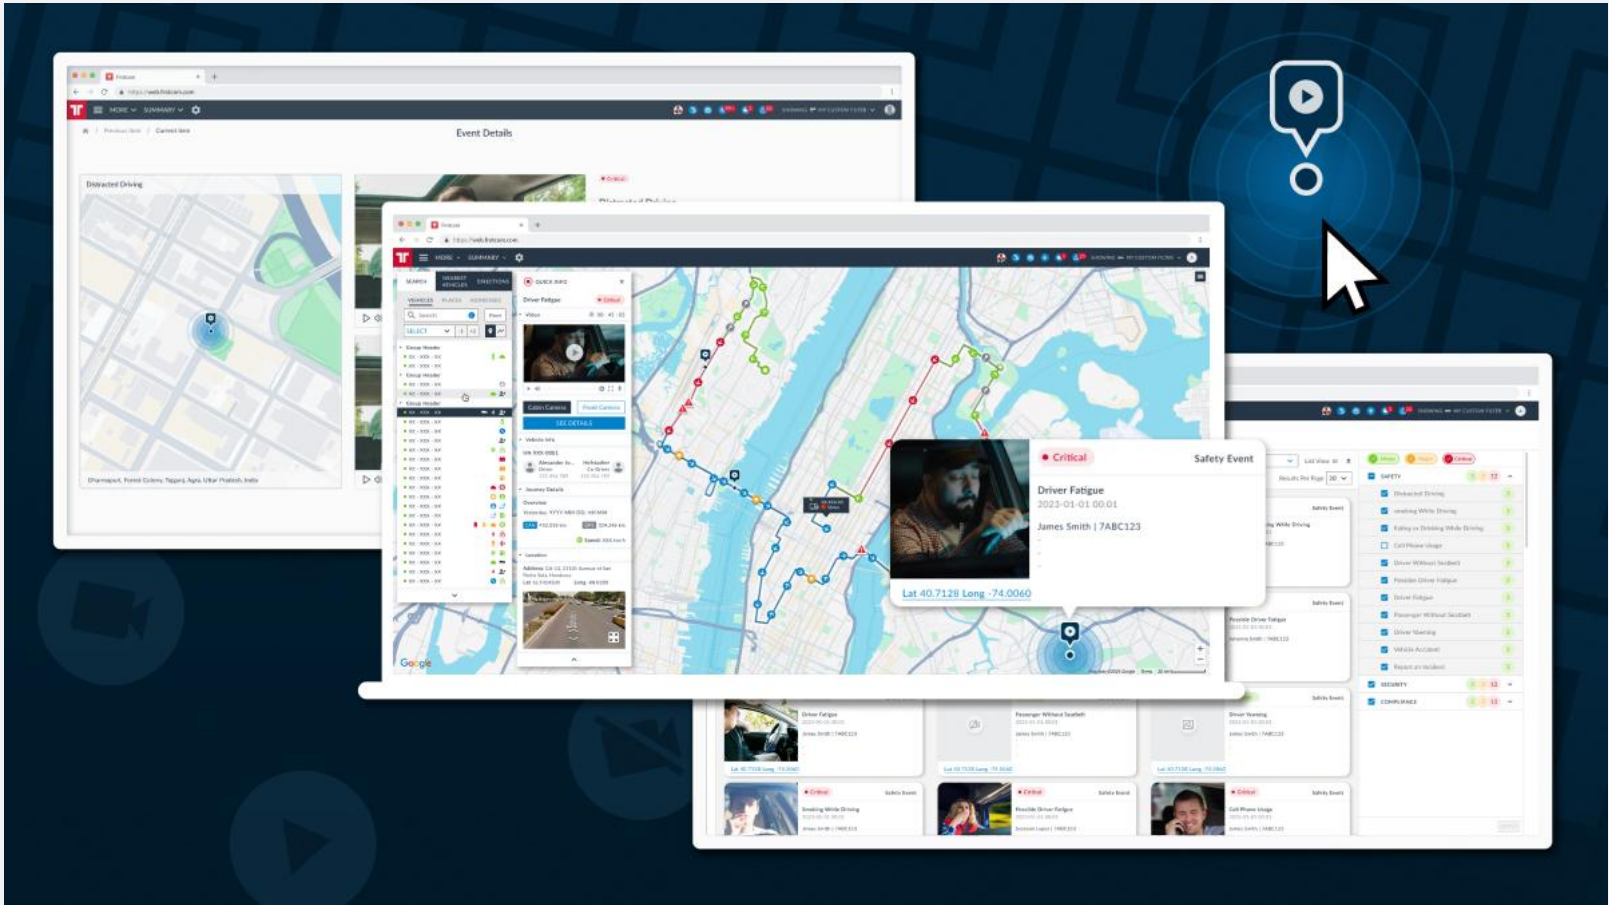

Protect Your Fleet Assets

Fleet assets represent significant investments that require continuous protection. Effective maintenance planning reduces downtime, extends vehicle lifespan, and lowers repair costs.

Video Telematics

Modern fleet management increasingly relies on **video technology** to improve safety, reduce risk, and protect drivers.

Forward-Facing Dashcams

HD video footage for accident evidence and disputes

In-Cabin AI Cameras

AI detection of fatigue, distractions, phone usage

Rear-Cabin Cameras

Monitor loading and unloading of goods

Incident Investigation

Quick access to footage for claims and compliance

Driver Protection: Protect professional drivers against false claims through objective video evidence.

Risk Reduction: Identify risky behaviours before they result in accidents or financial losses.

03

INTELLIGENCE & IMPACT

Turning fleet data into strategic business decisions

FleetPulse 360 & Business Intelligence

FLEETPULSE 360

Frotcom's advanced fleet intelligence platform that **transforms operational data into strategic business insights** for smarter decision-making.

Fleet Efficiency Indicators

Clear, intuitive dashboards for performance

Fuel Performance Analytics

Track efficiency trends and cost reduction

Driver Behaviour Insights

Monitor performance improvements over time

Vehicle Utilisation Metrics

Identify productivity opportunities

Cost Management Intelligence

Monitor costs across departments and units

Executive Dashboards

Consolidated KPIs and operational priorities

Data-Driven Decision Making: Transform operational information into meaningful business intelligence that supports strategic planning. Available reports include fleet utilisation, driver performance, fuel consumption, maintenance, cost analysis, and executive KPI dashboards.

Sustainability & Environmental Responsibility

Organisations worldwide are increasingly focused on **environmental performance and sustainability**.
Frotcom contributes to these initiatives through intelligent fleet management.

Eco-Driving Programs

Encourage fuel-efficient driving habits that reduce costs and environmental impact

Reduced Fuel Consumption

Identify and eliminate inefficiencies contributing to unnecessary fuel usage

Lower Carbon Emissions

Support corporate sustainability objectives through optimised fleet operations

Route Optimisation

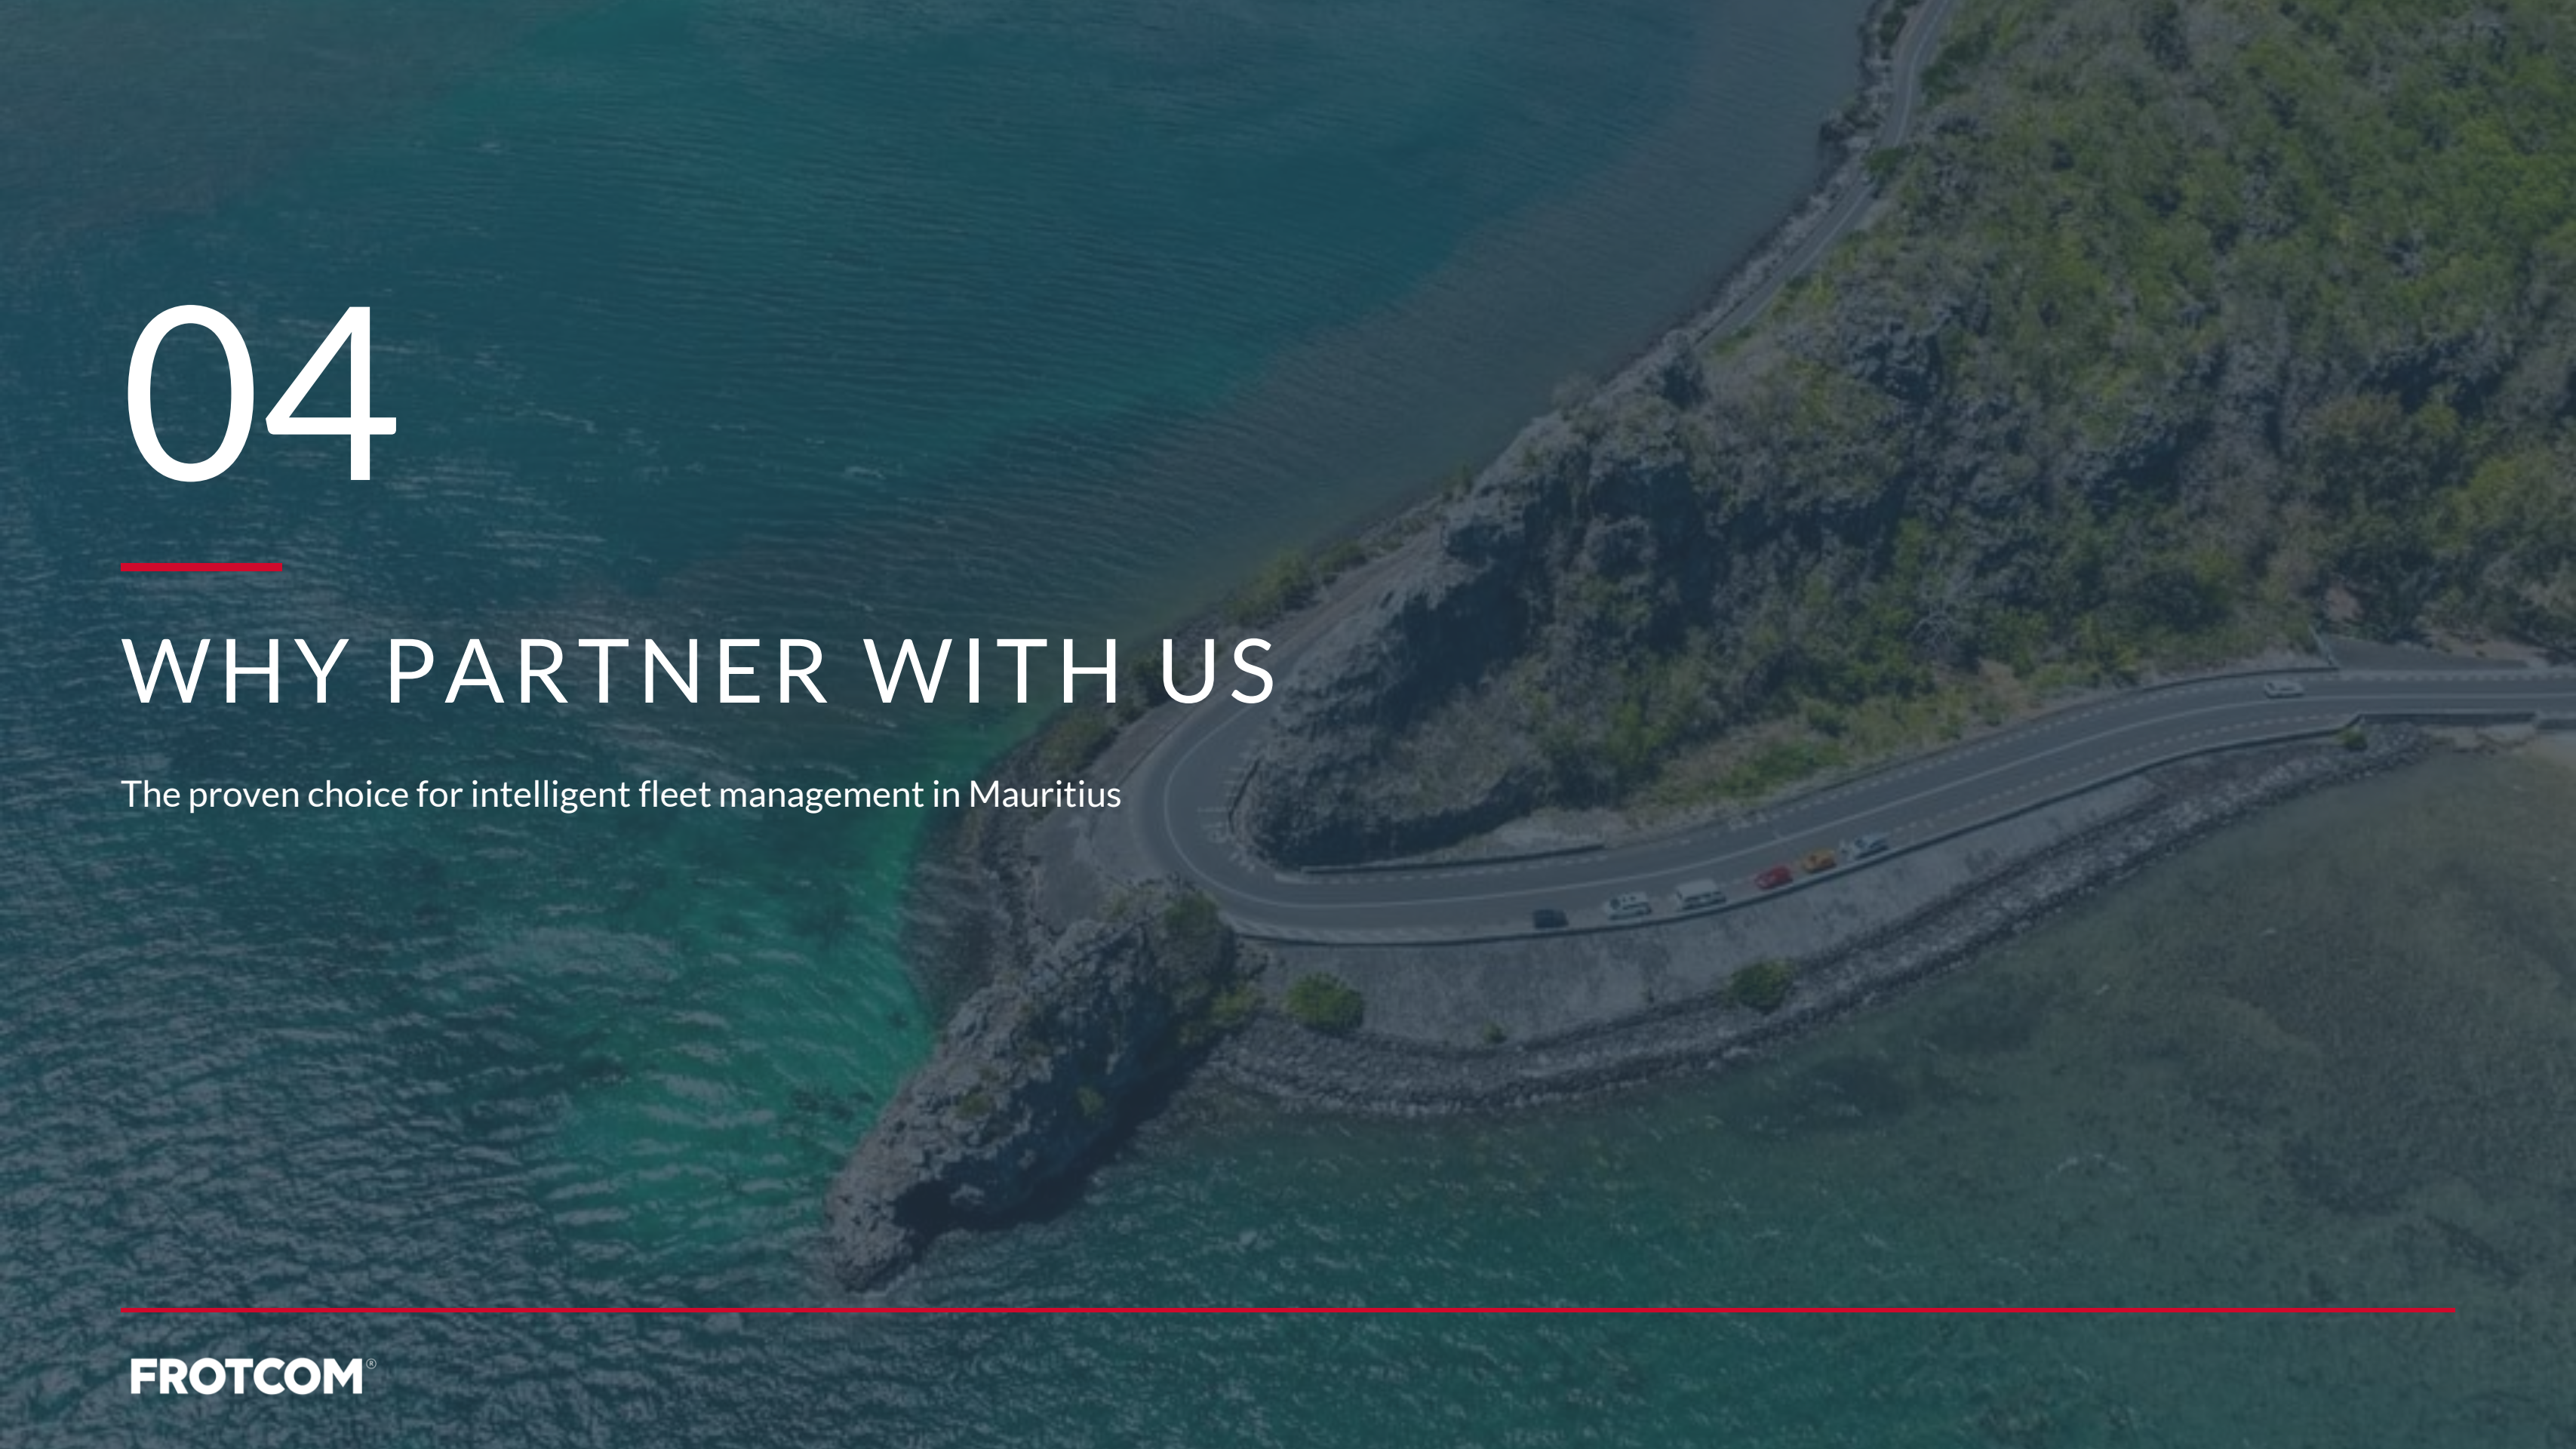

Reduce mileage, travel time, and environmental impact through improved route planning and intelligent dispatching

Reduced Vehicle Idling

Minimise unnecessary engine running time to lower emissions and operating costs across the entire fleet

Frotcom helps organisations achieve their sustainability goals while simultaneously reducing operational costs and improving fleet efficiency.

04

WHY PARTNER WITH US

The proven choice for intelligent fleet management in Mauritius

Why Organisations Choose Frotcom

01

Proven Local Experience

Operating in Mauritius since 2008 with extensive local knowledge

02

3,000+ Vehicles Managed

One of the largest fleet management deployments in Mauritius

03

Dedicated Local Support

Professional installation, training, and technical assistance

04

Global Technology Platform

Backed by continuous international R&D investment

05

Comprehensive Intelligence

Single platform for tracking, fuel, maintenance, and video

06

Scalable & Future-Proof

From small fleets to large enterprise operations

07

Measurable ROI

Reduce costs, improve productivity, enhance safety

08

Long-Term Partnerships

Building trusted relationships since 2008

Our Commitment

We are committed to delivering more than technology. We build long-term partnerships by combining world-class fleet management solutions, international expertise, and dedicated local support. Our objective is to help organisations gain greater visibility, stronger operational control, improved safety, reduced costs, and measurable business improvements.
